Help boost revenue by converting  
leads into clients

## EASY SEARCH ACCESS

Make your website easily searchable  
on Google

## BRAND CREDIBILITY

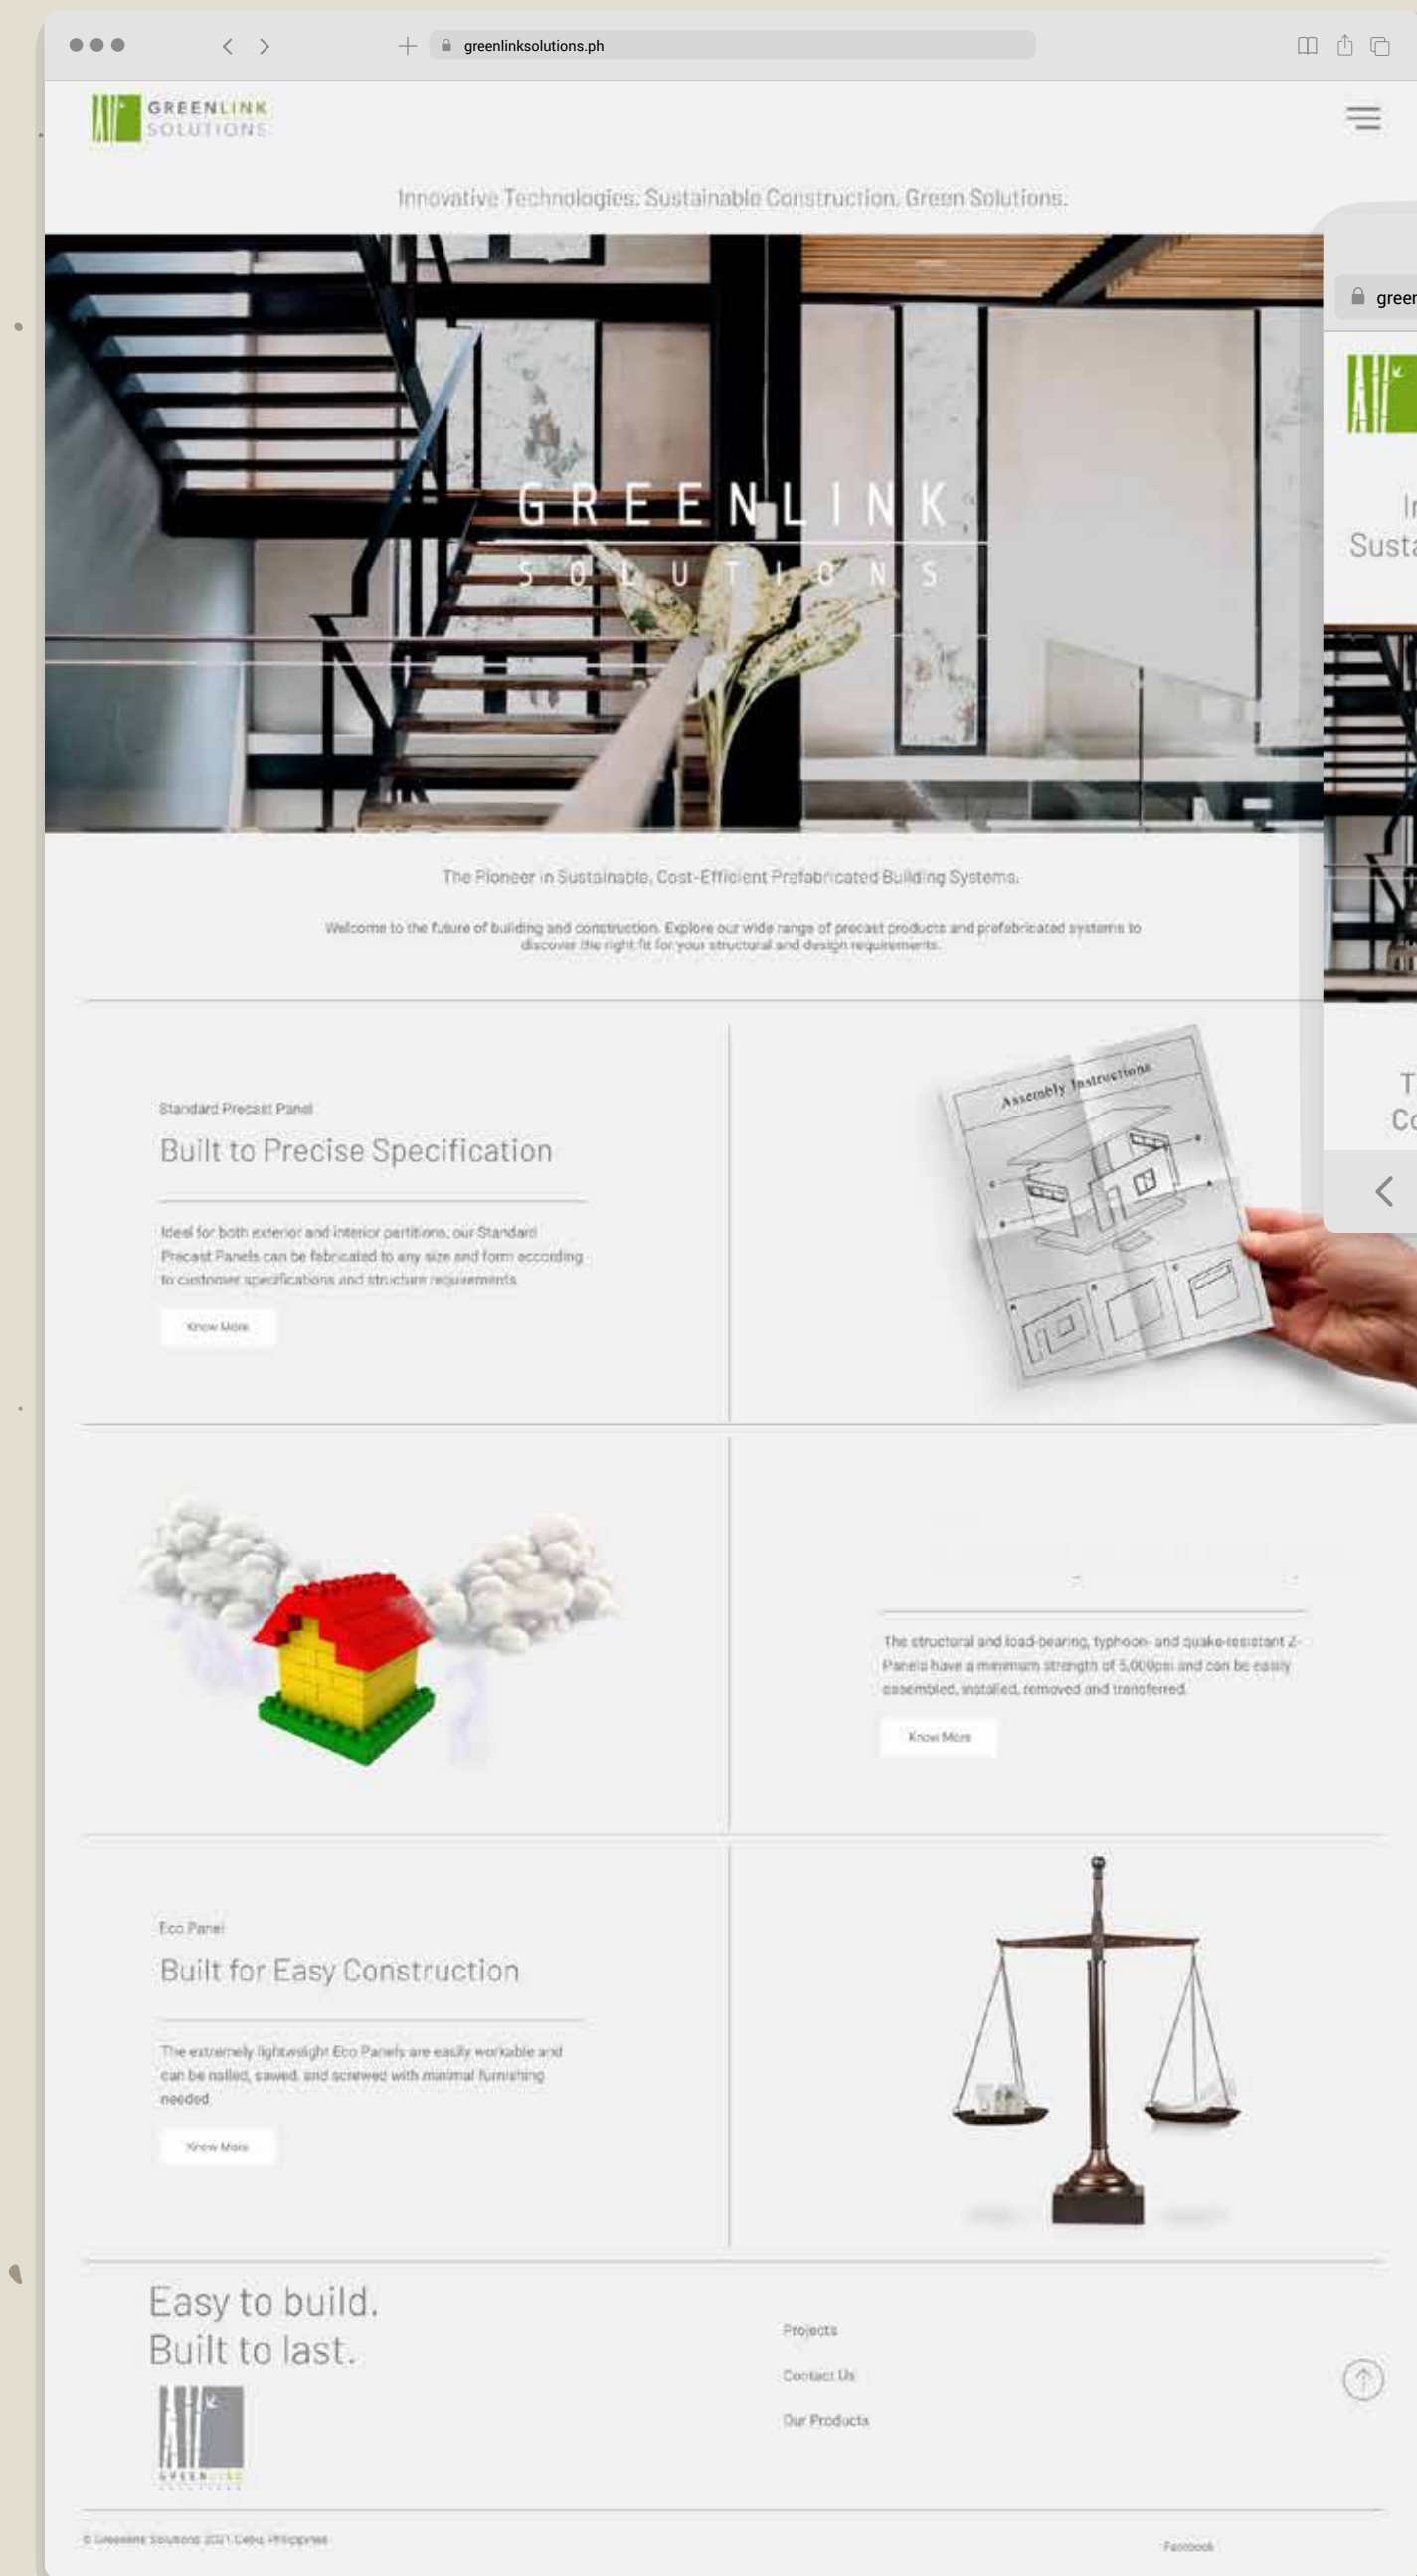

Establish yourself as a legitimate  
business with an official website

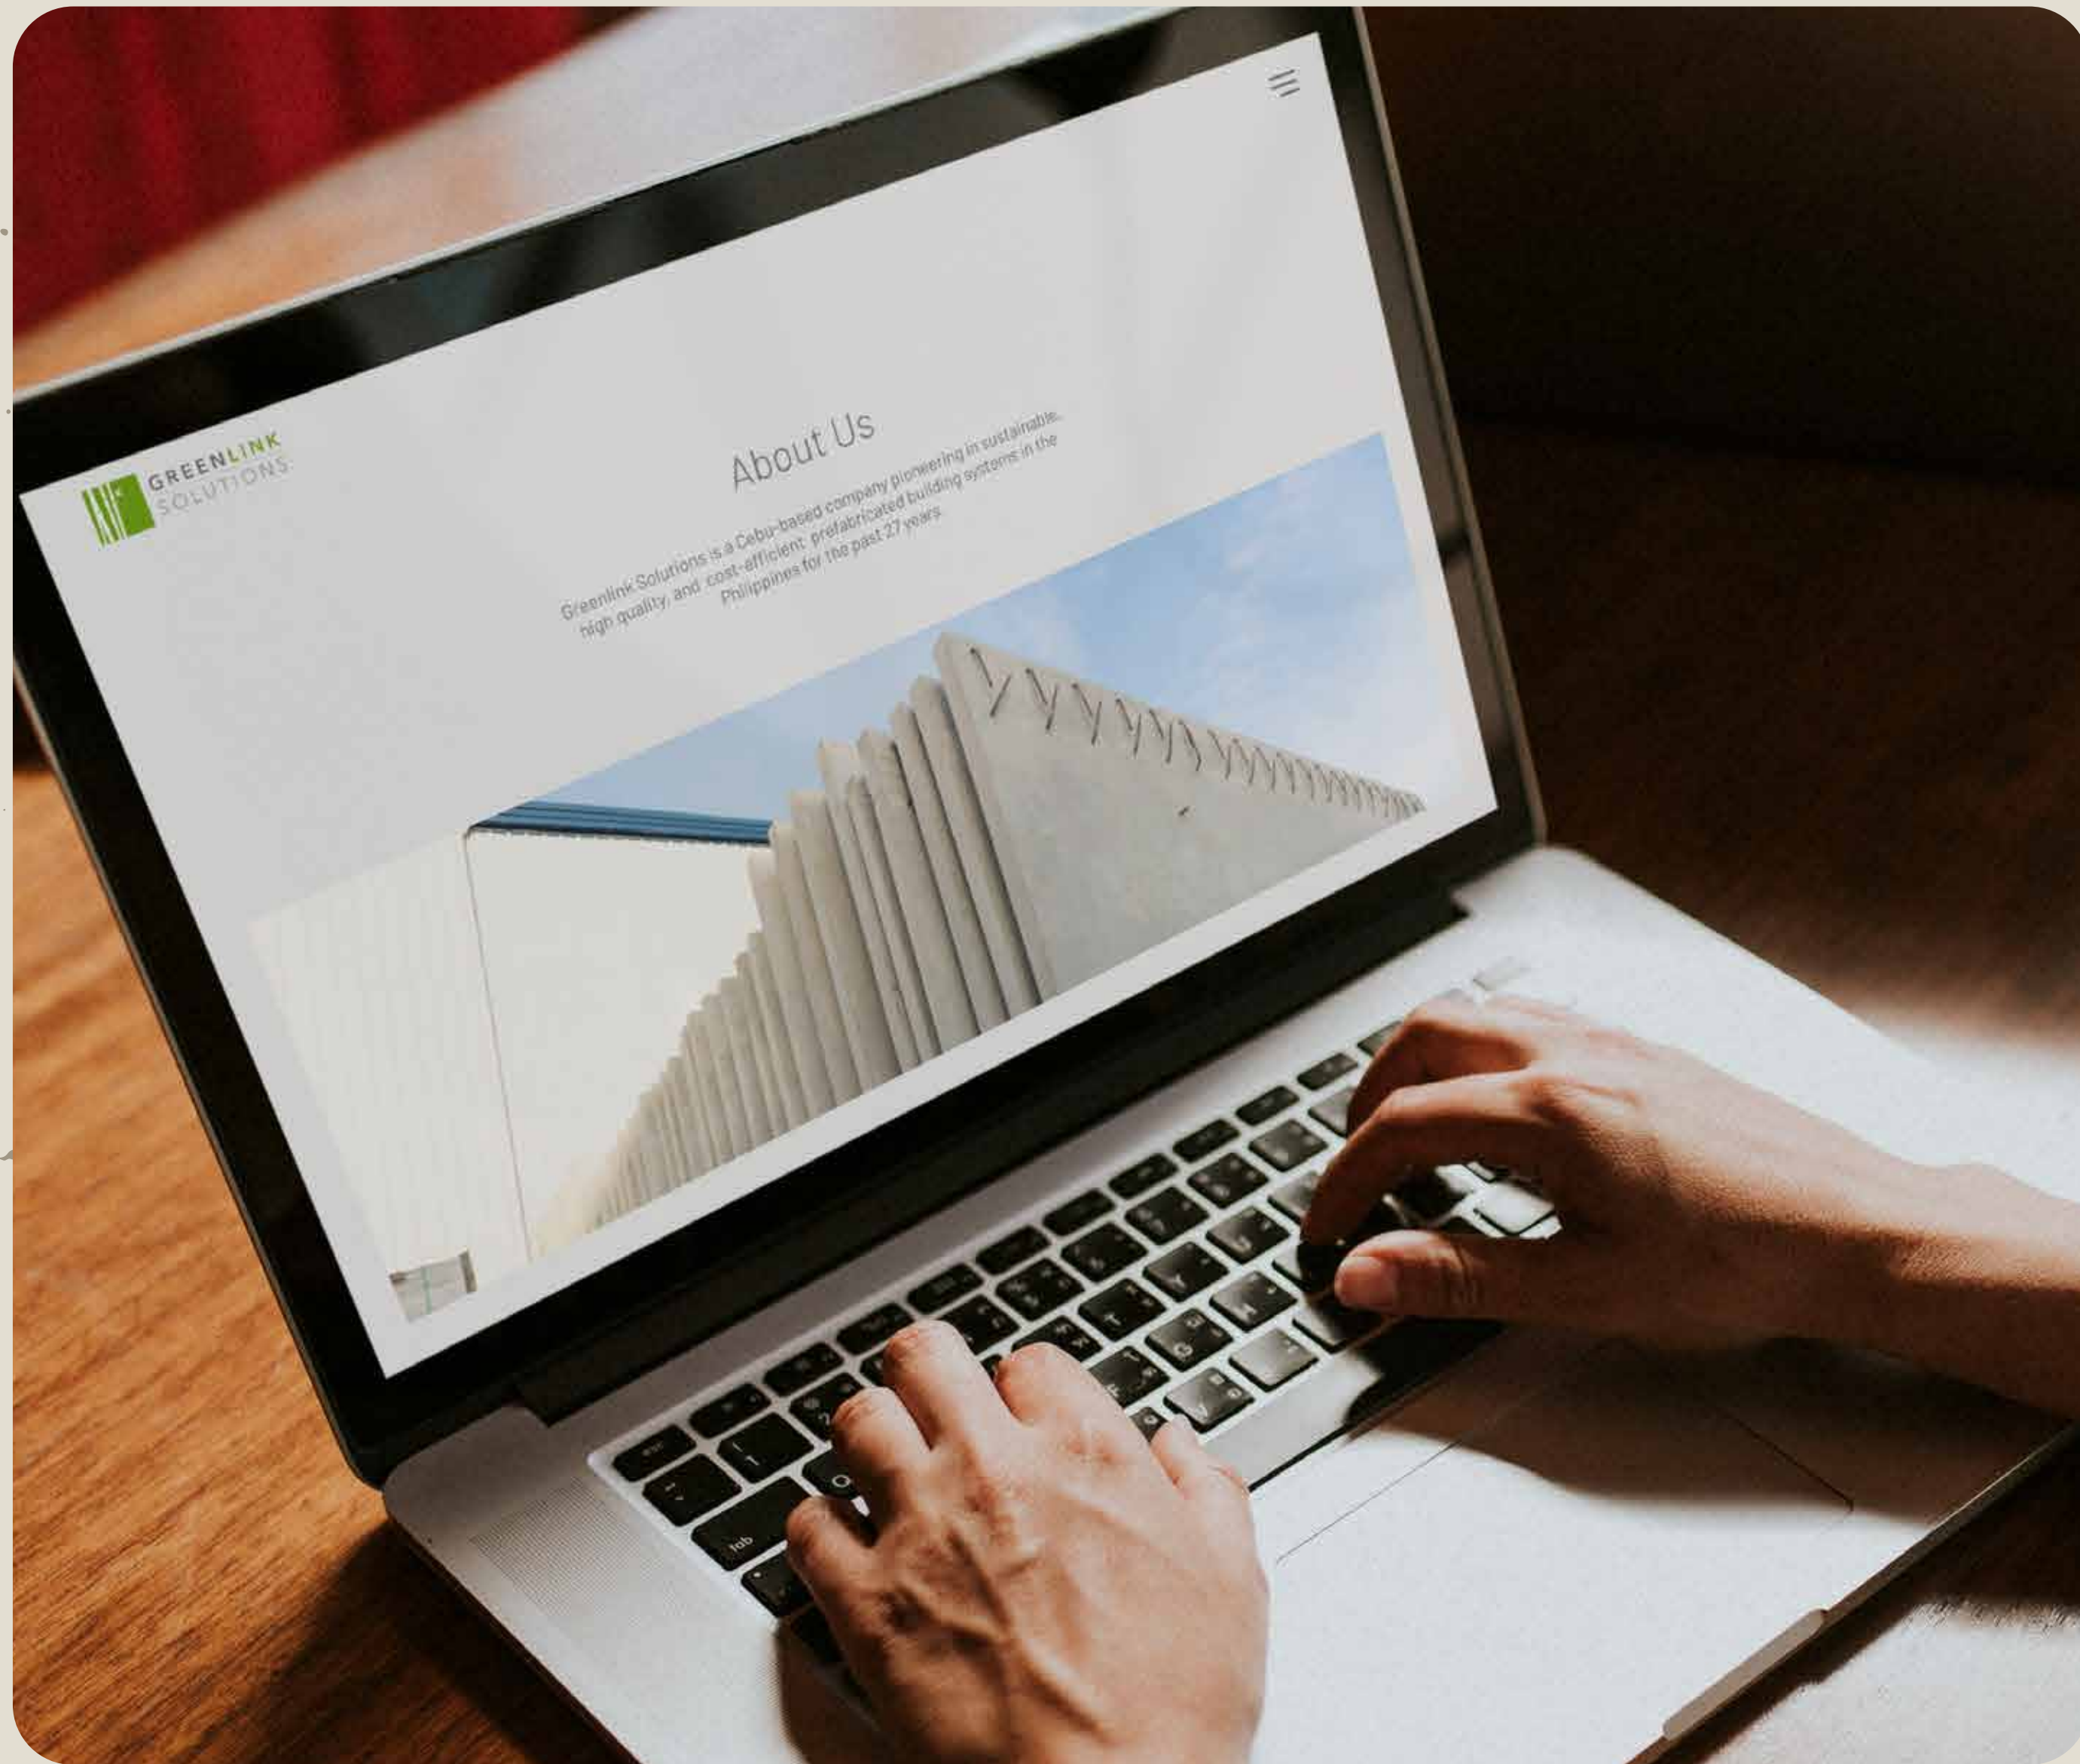

# Our Web Design Work

# Greenlink Solutions

Greenlink Solutions is a company that provides prefabricated materials for construction. They needed a clean and modern website to showcase the unique features of their products. Thus, the big responsive image for the cover of each page showing the quality and massive size of each product.

We used clean, modern font for easy readability. The website also features different projects utilizing their products.

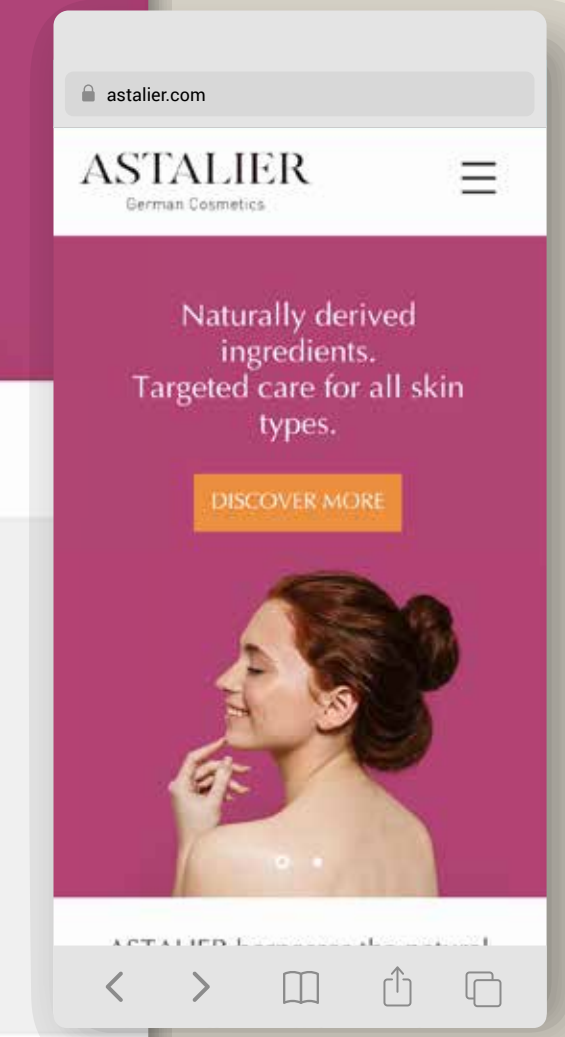

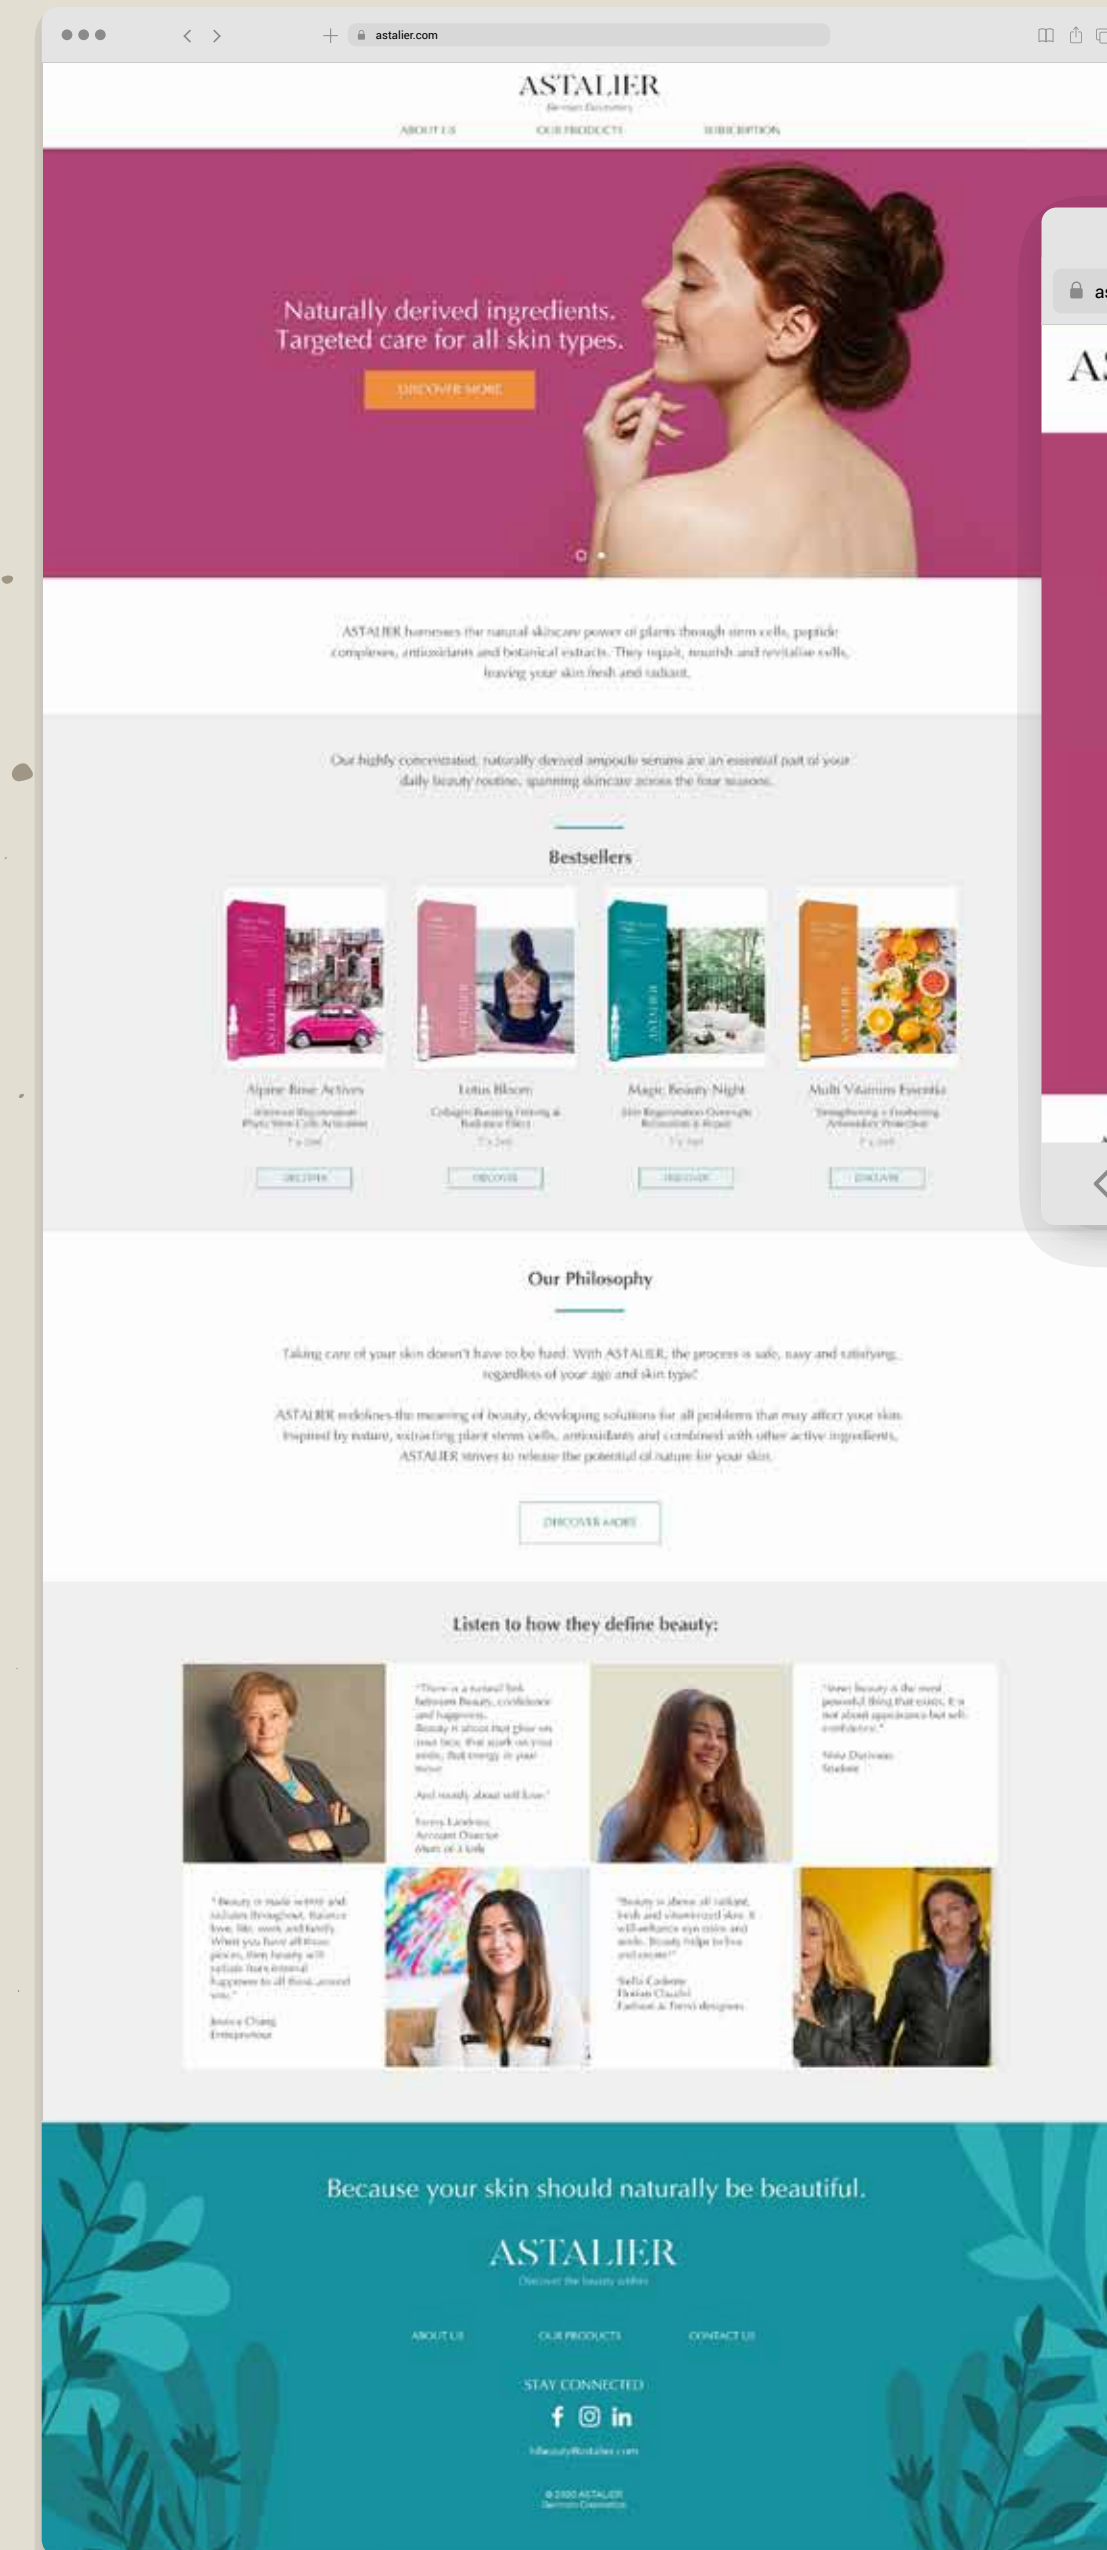

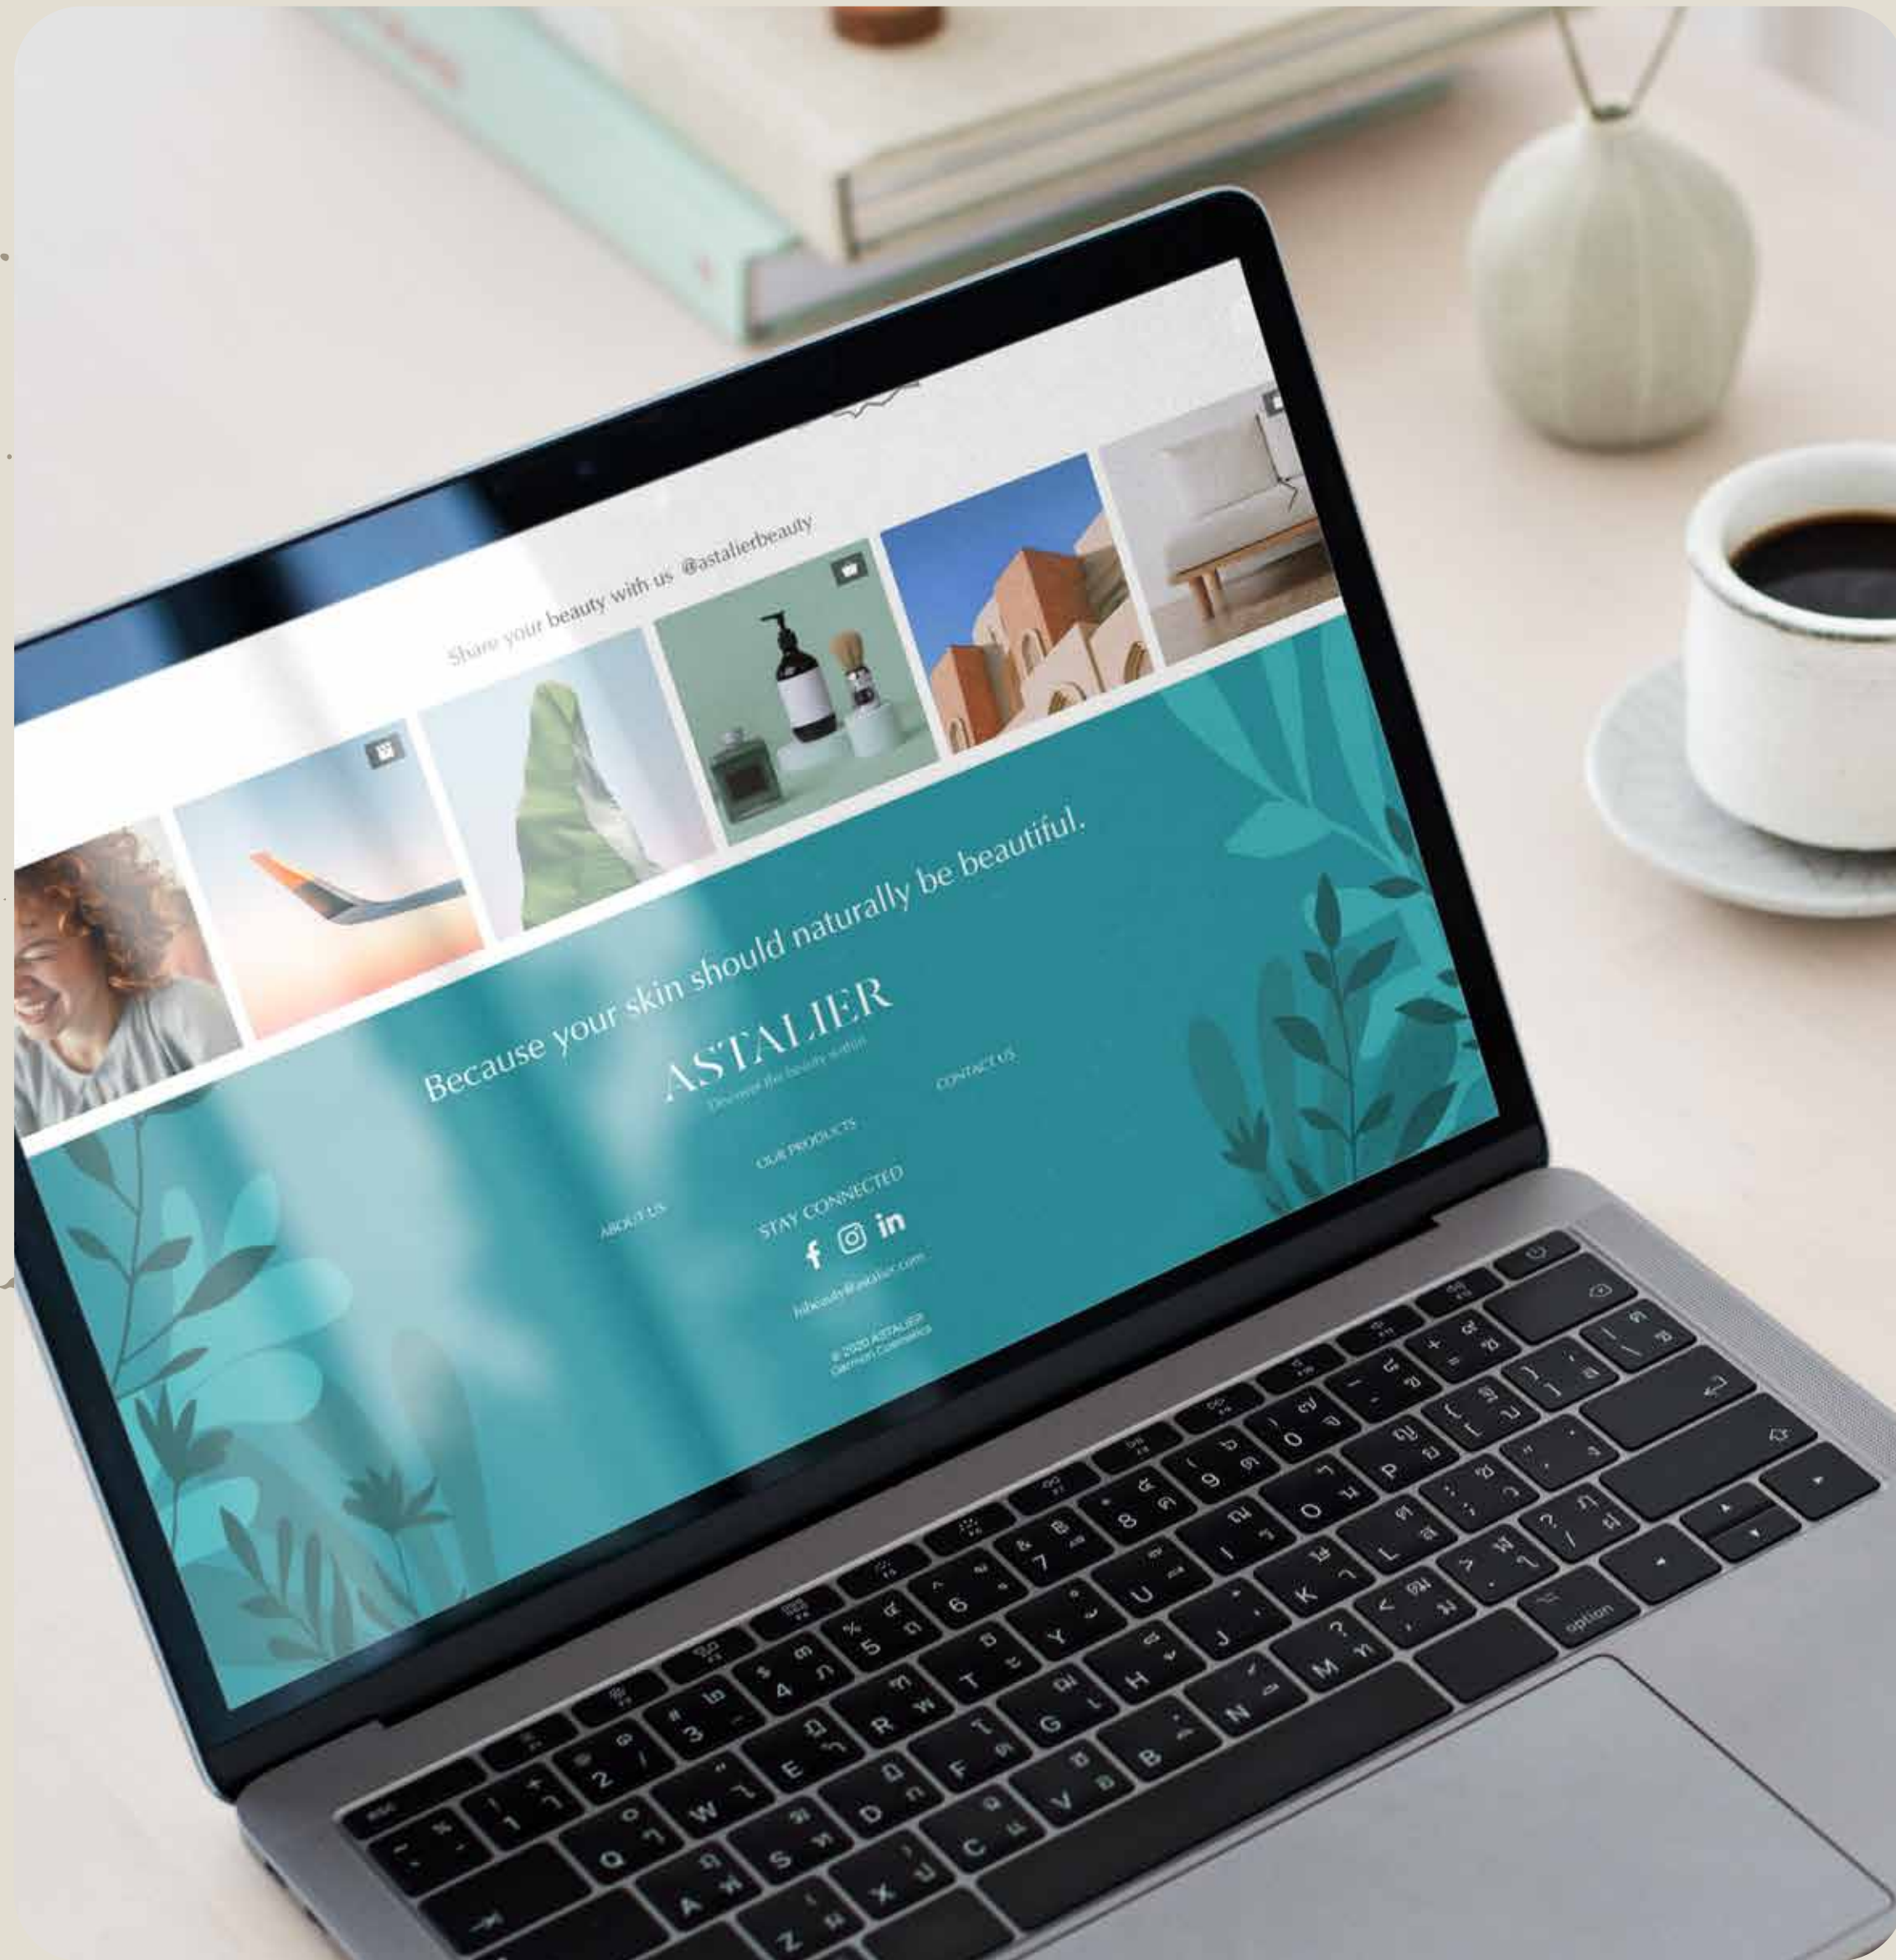

The flow of the website is straight to the point, much like their products, which are efficient and easy to use for construction. The user can also find everything they need and can easily contact the business for inquiries or collaborations.

# Astalier

Astalier is a German-based brand offering beauty serums which have different benefits.

They wanted a clean website that was also classy and sleek. The images were placed on solid colorful backgrounds to give a fresh and feminine approach.

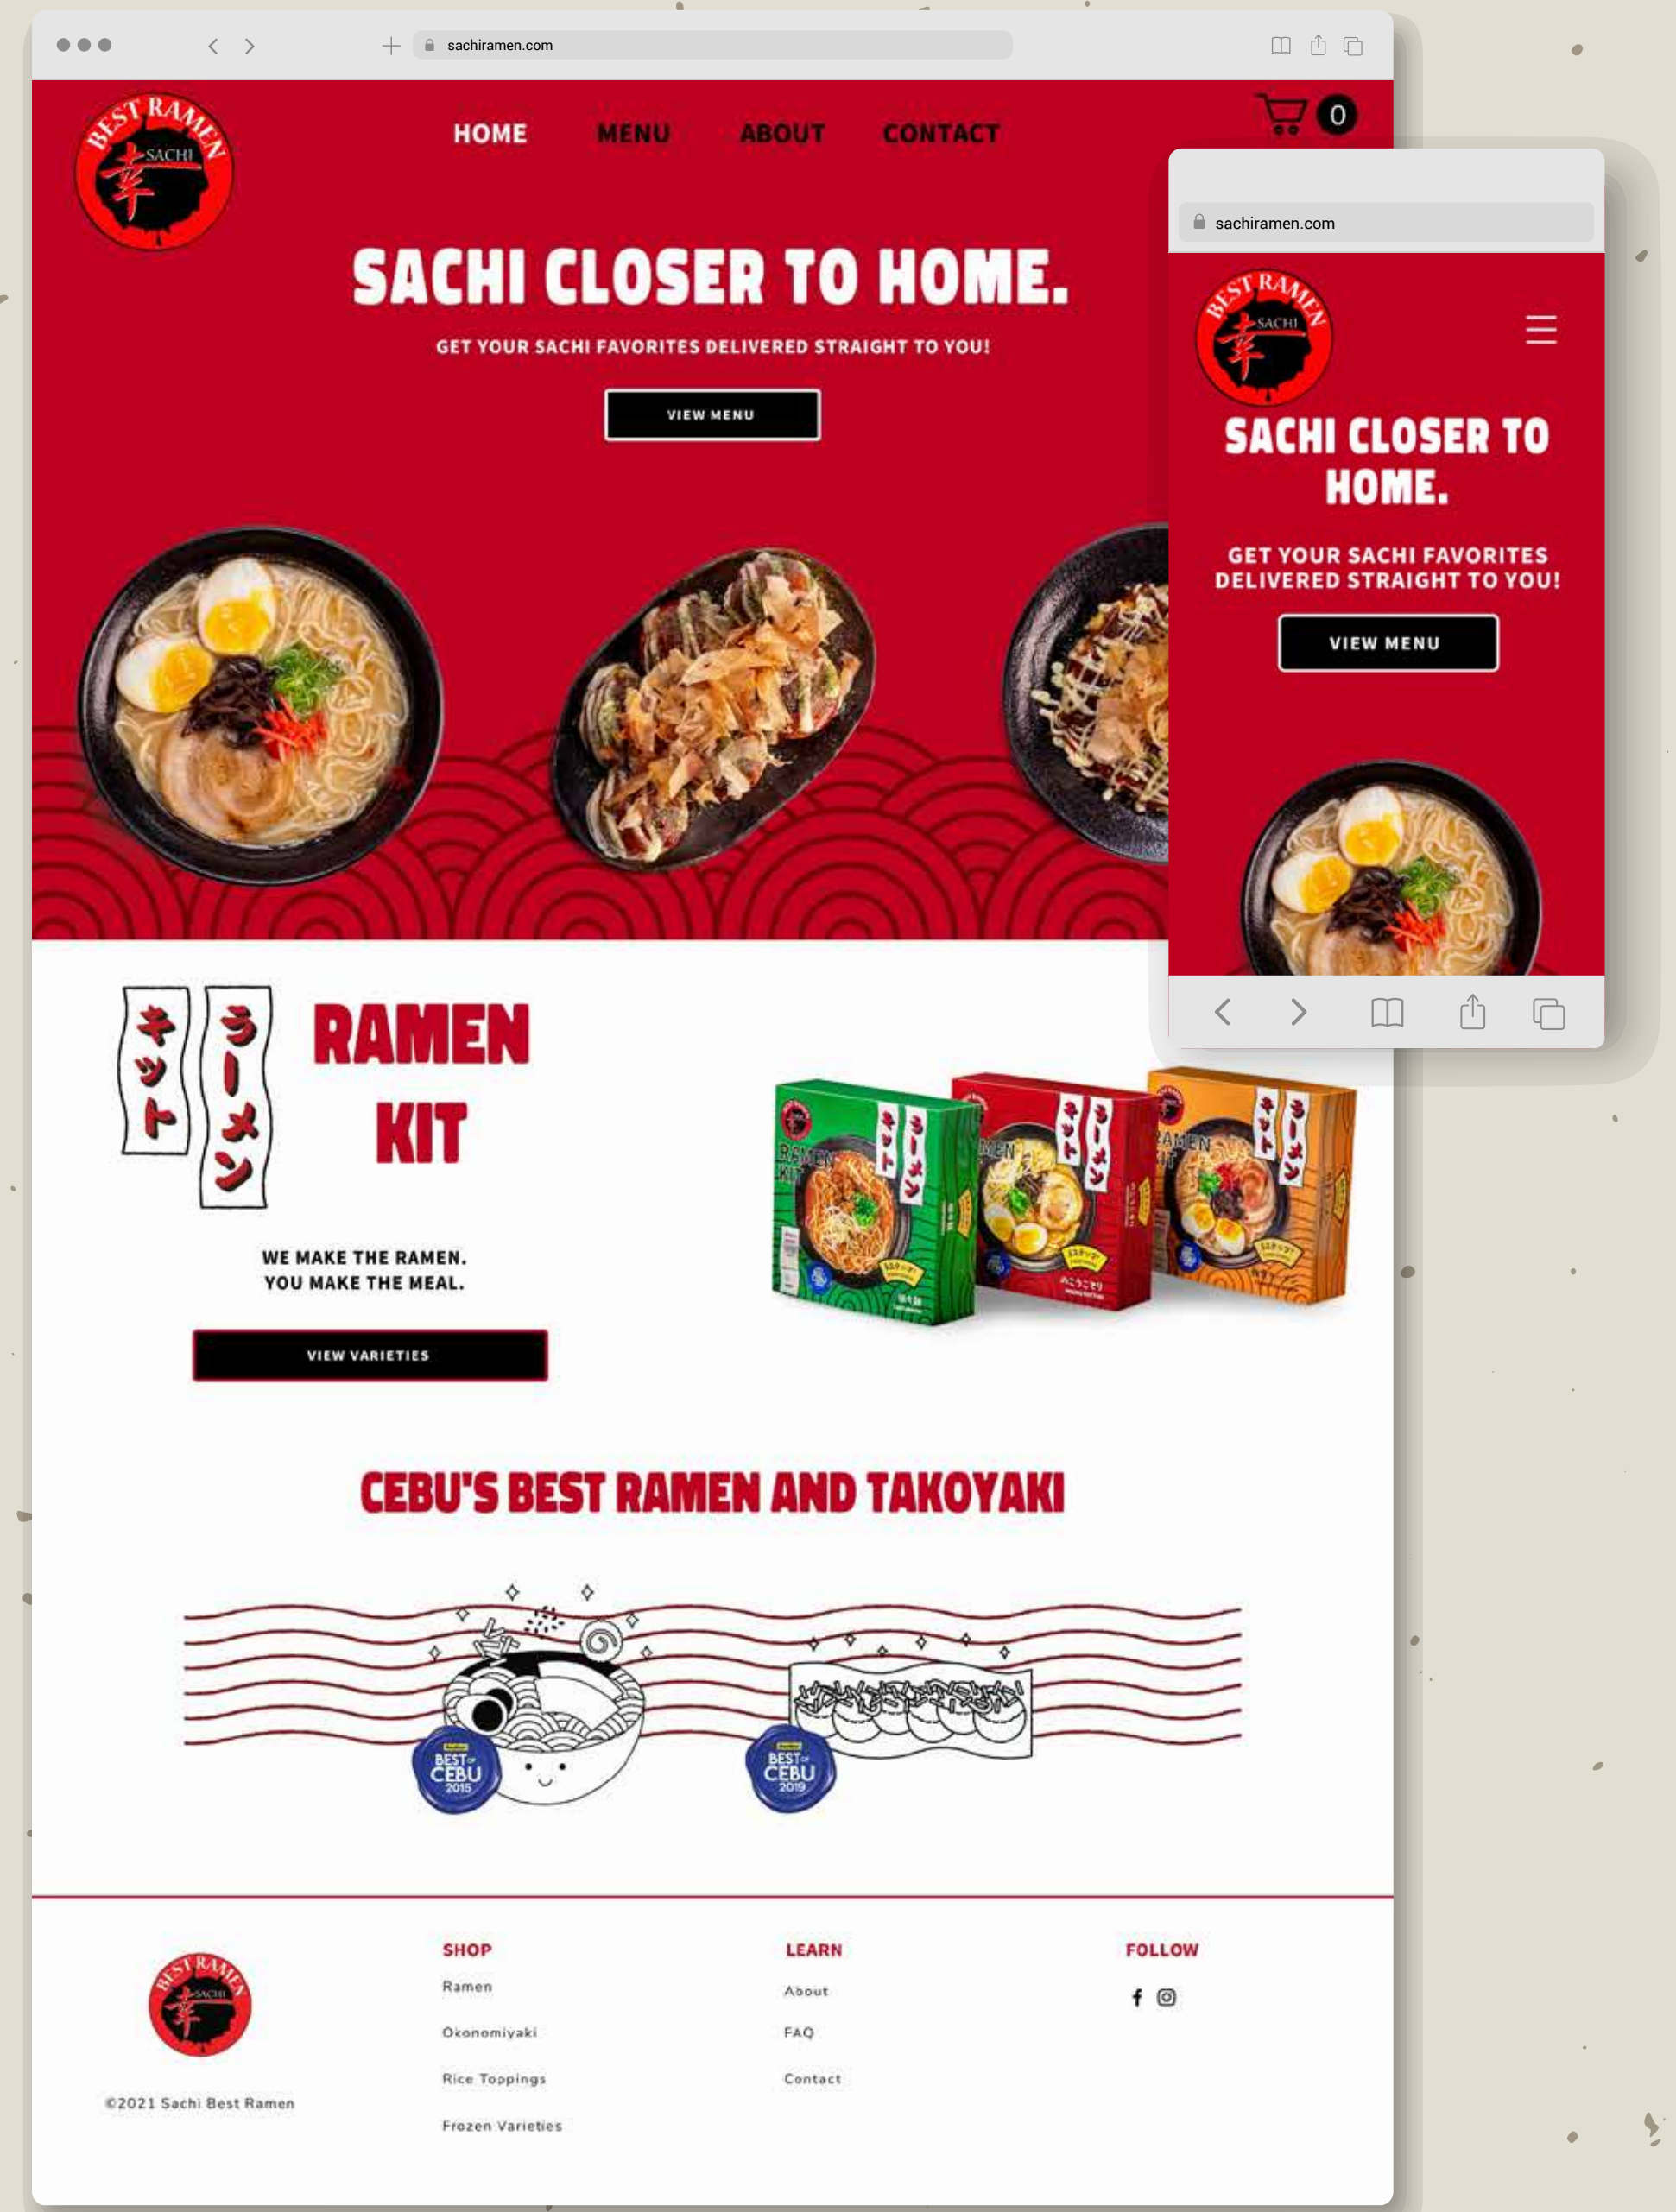

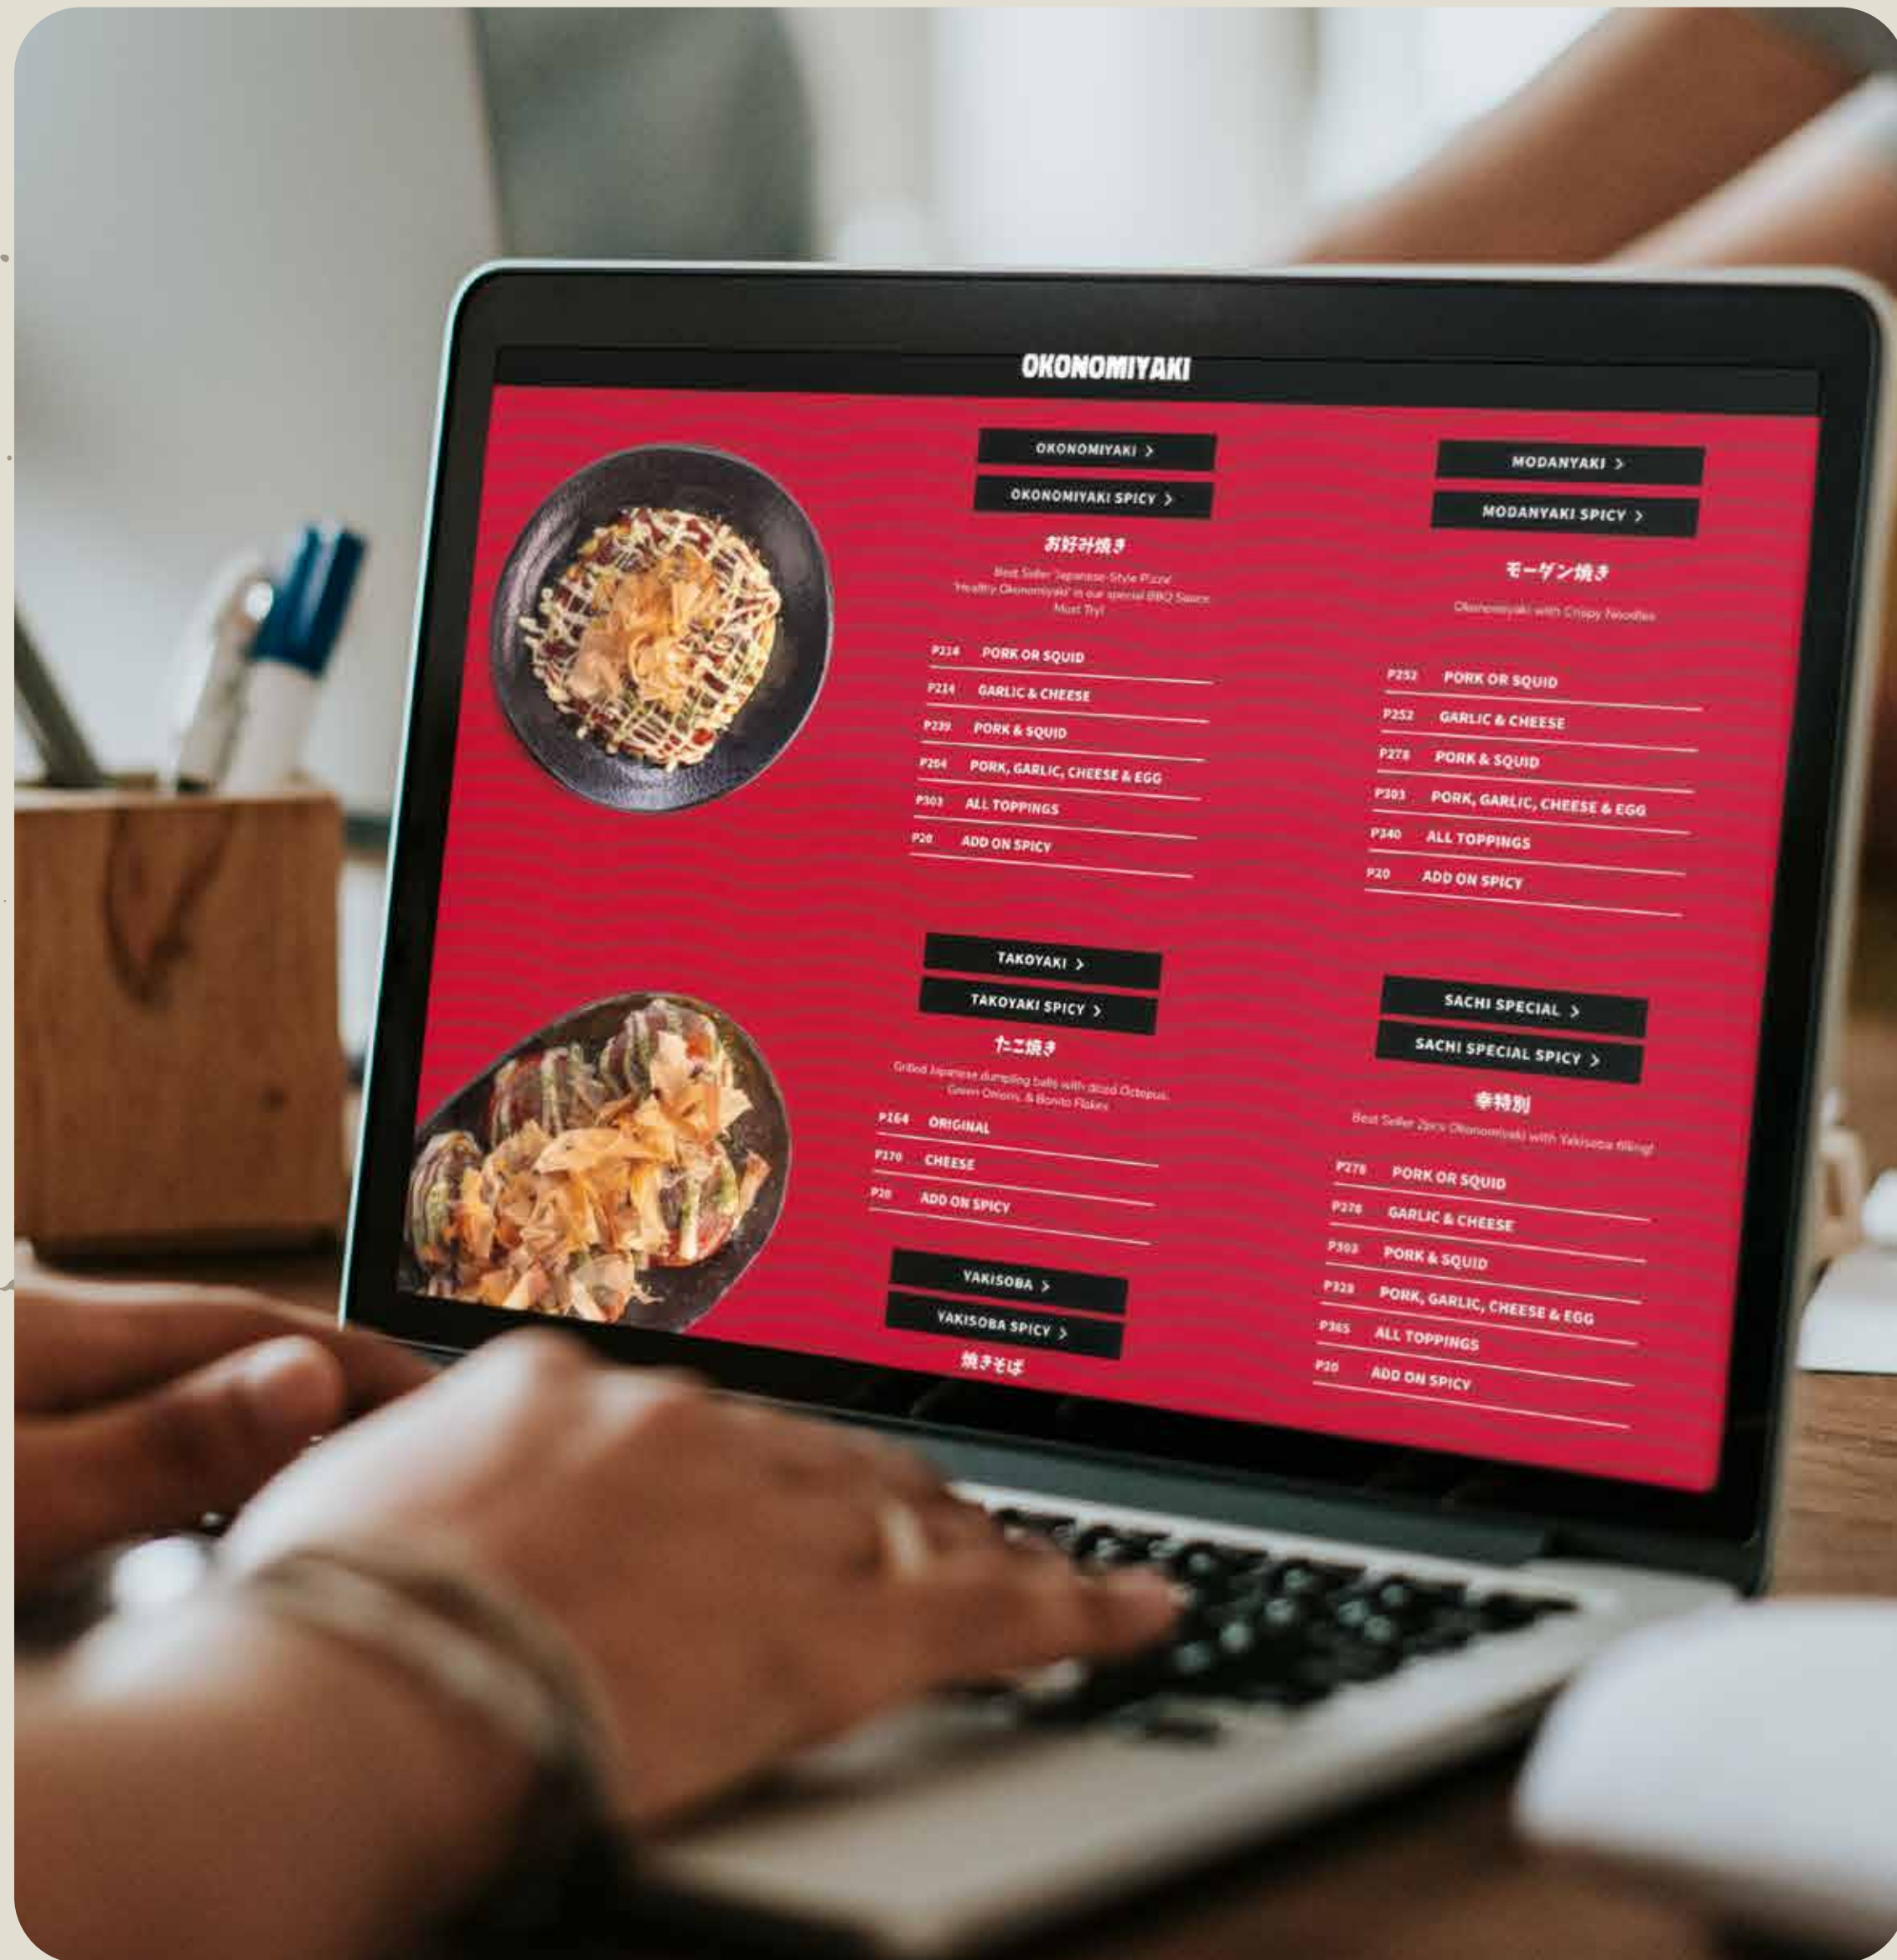

We wanted the footer to be unique and not like any other beauty product website. So we created a custom foliage illustration and made a simple animation for the background.

# Sachi Best Ramen

When the pandemic hit, a lot of restaurants had a hard time since delivery was already a requirement. Third party apps would charge a fortune. So aside from creating frozen product packaging for retail, we also created a website where customers can still order their Sachi favorites online.

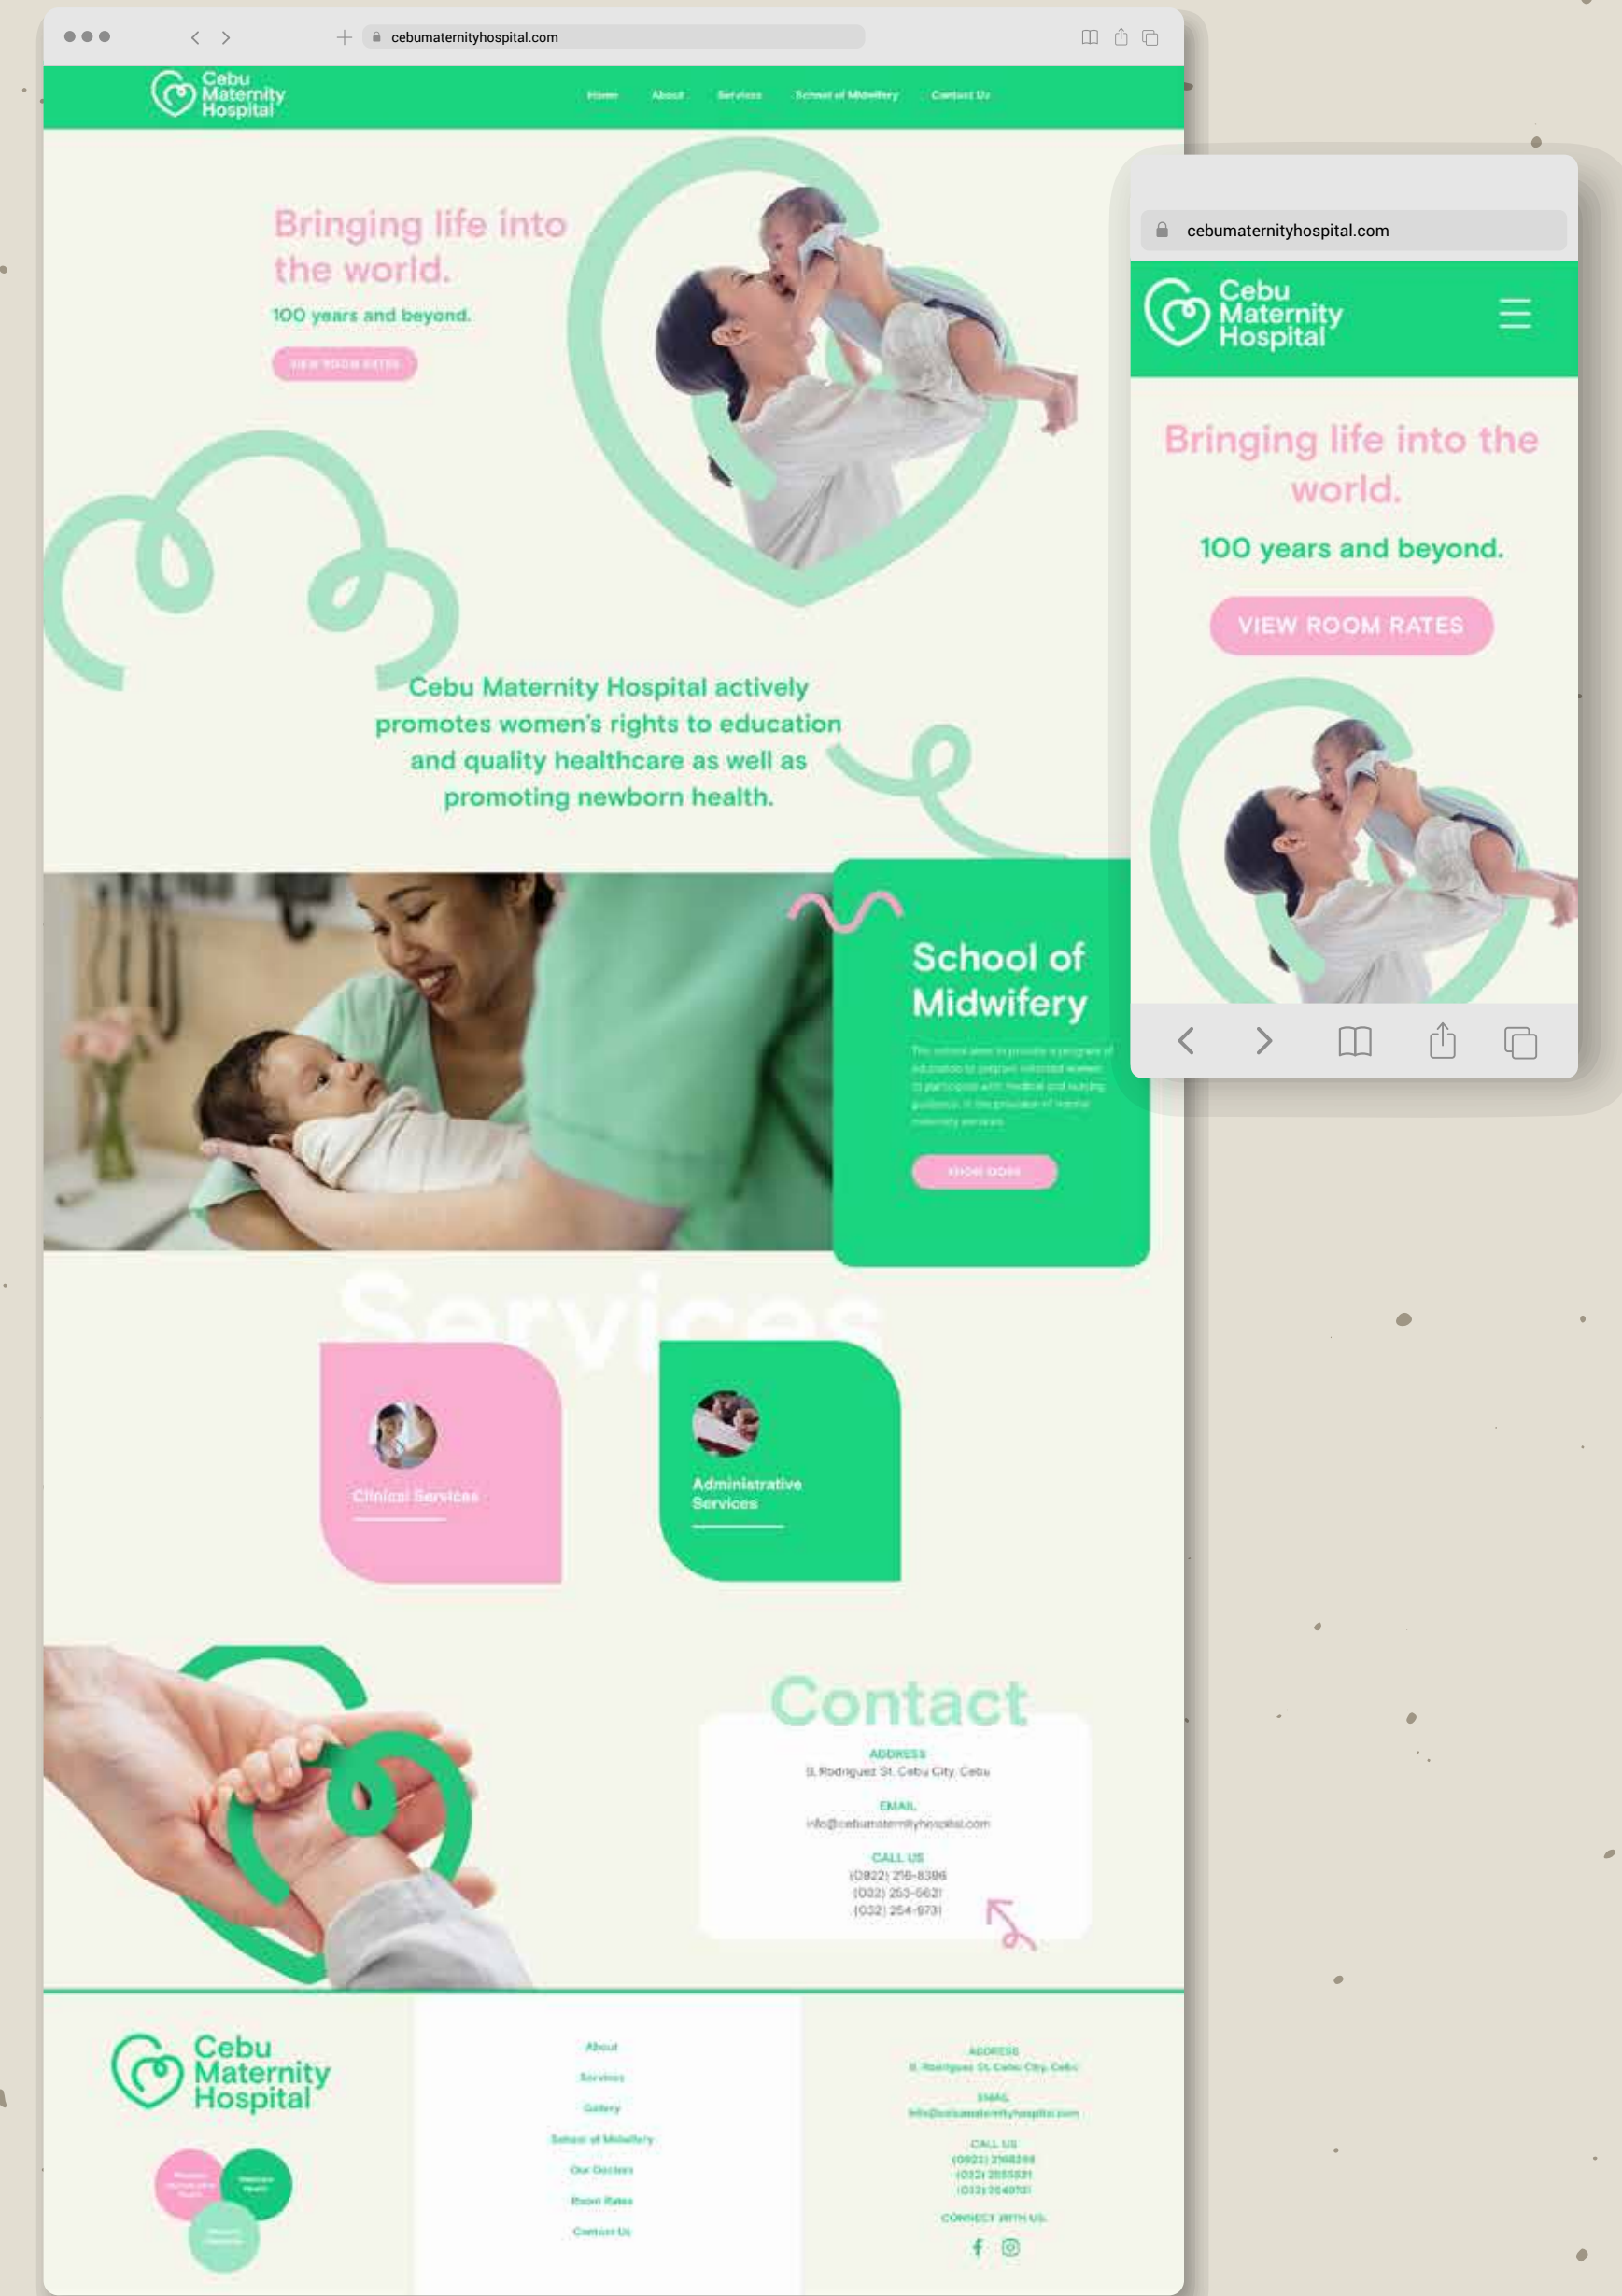

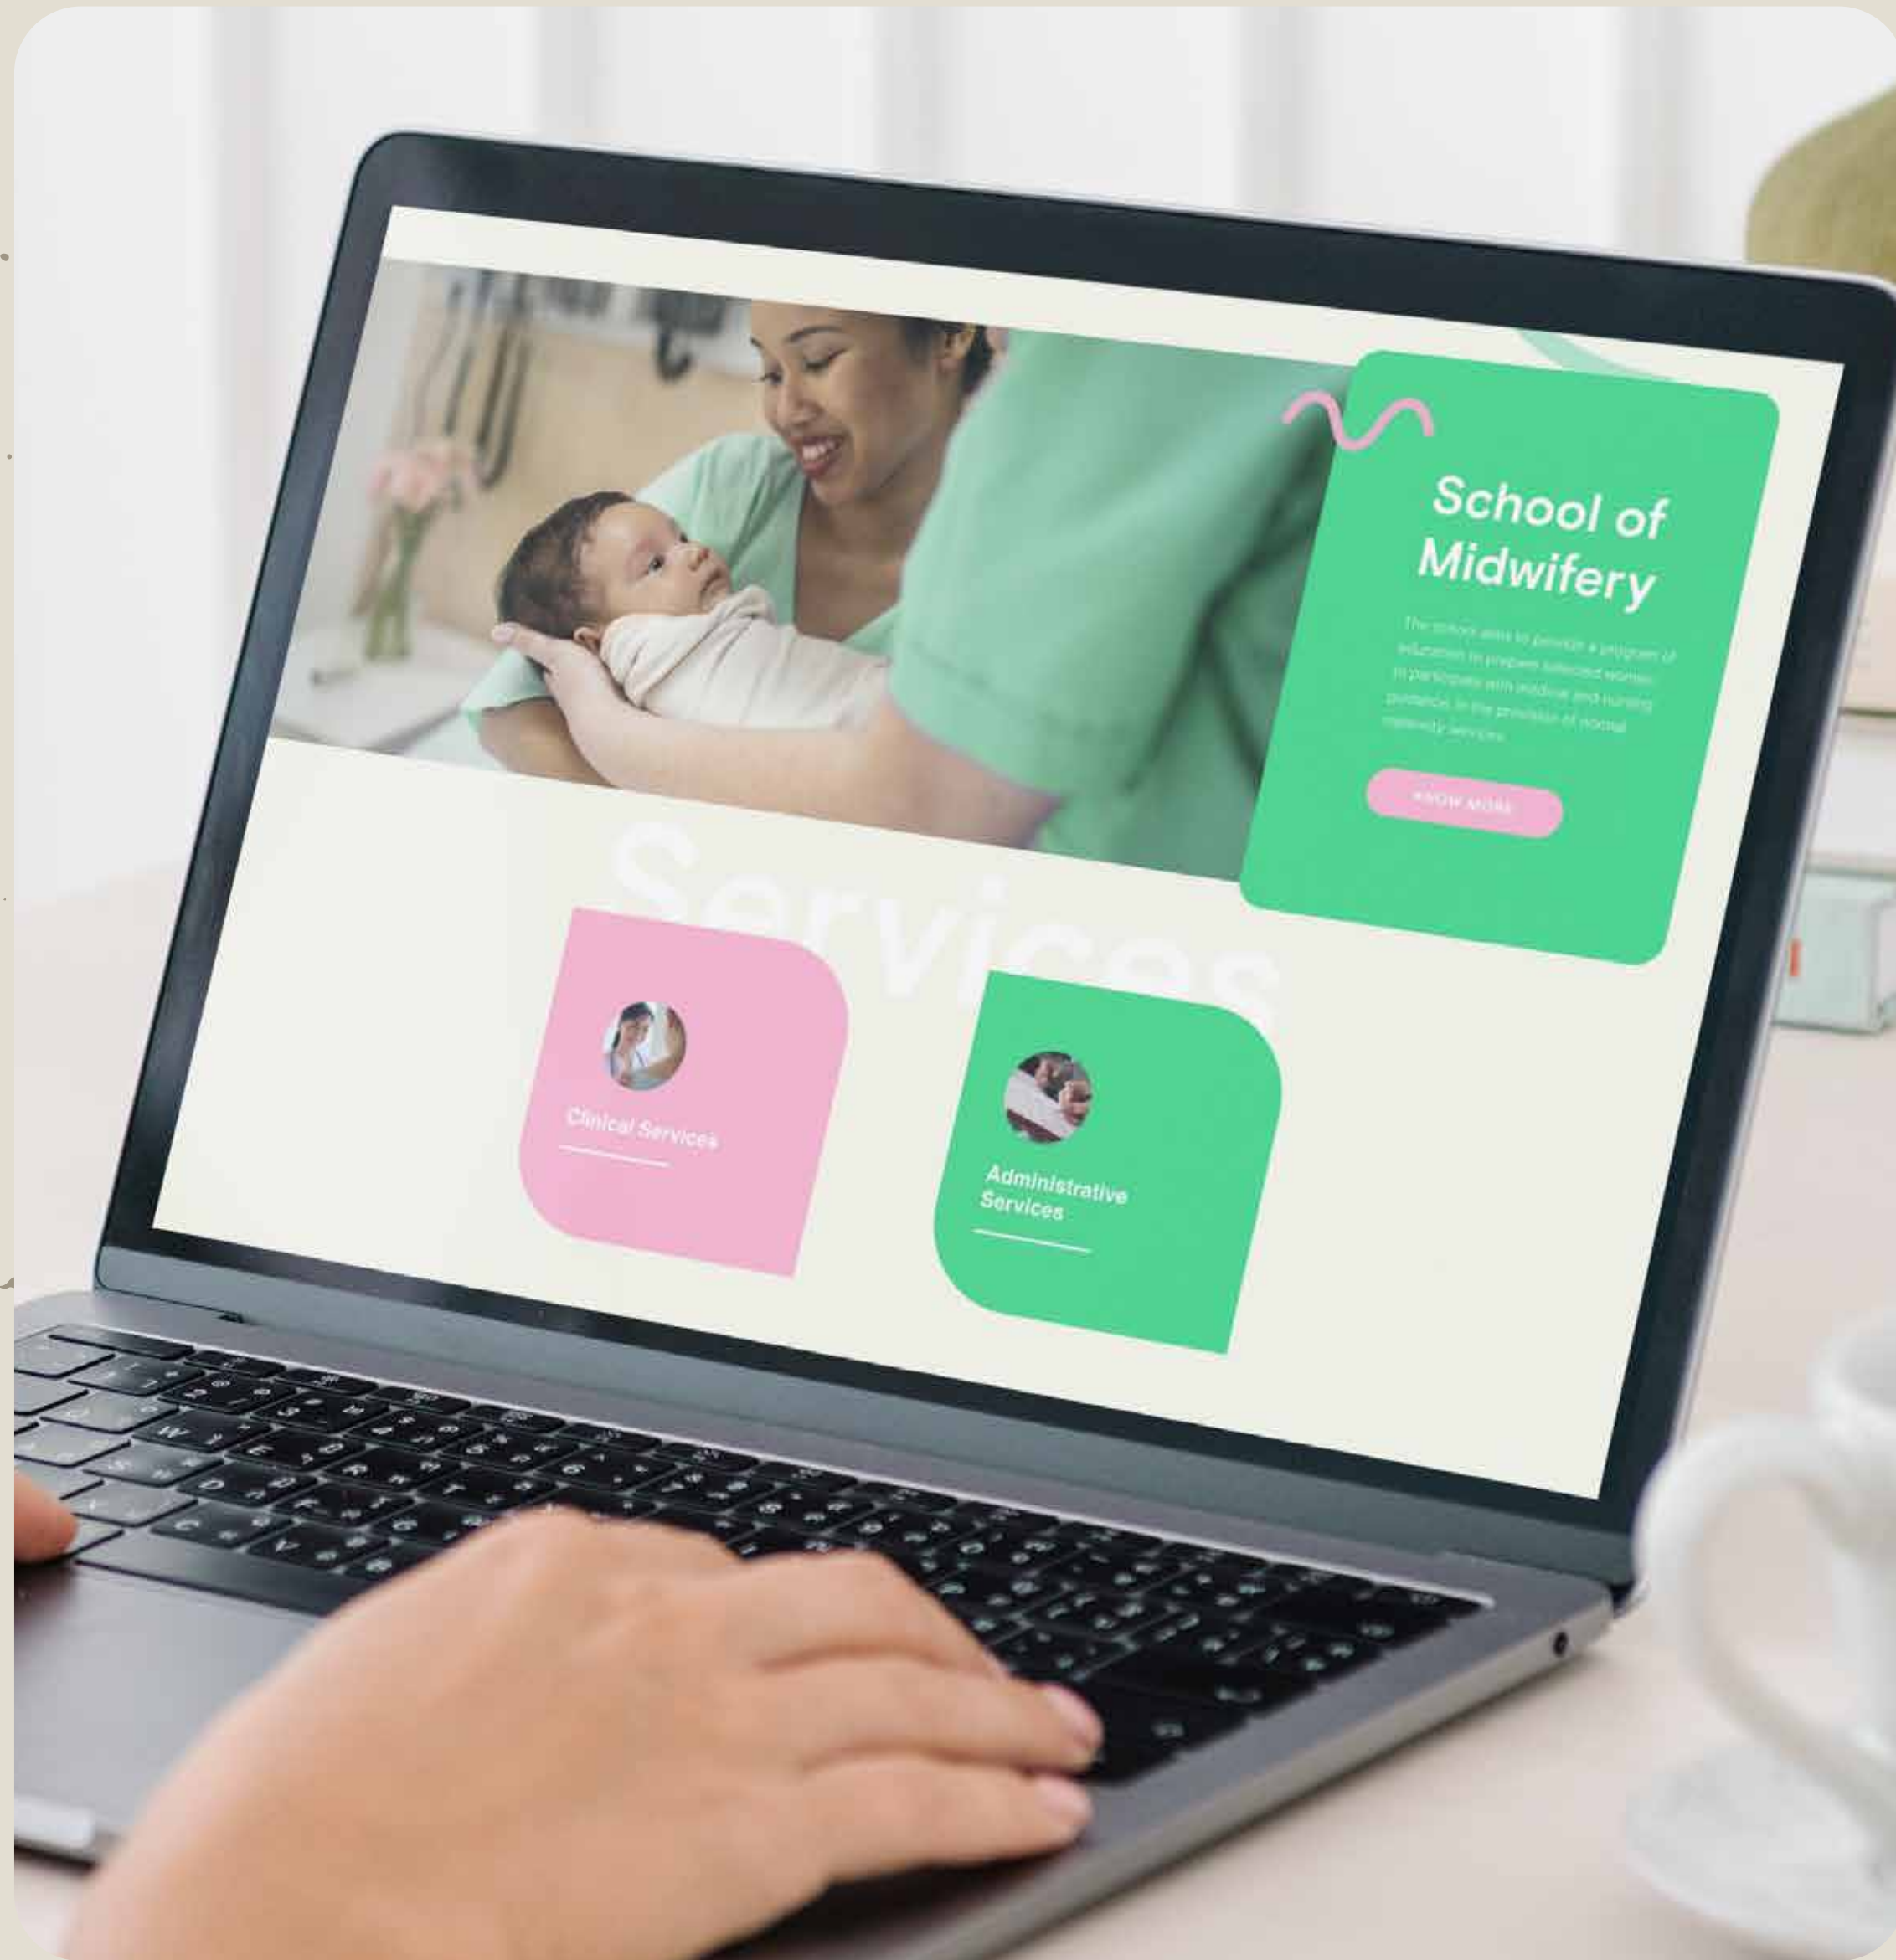

The custom pattern and illustrations were incorporated into the website design for a cohesive look. We also made sure to photograph the dishes in a top view as well since this view is a really easy and fun way to layout the website

# Cebu Maternity Hospital

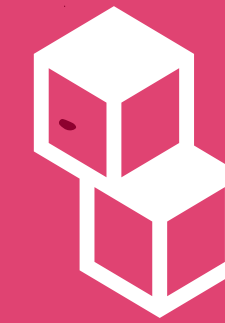

Together with Cebu Maternity Hospital's rebranding, they also needed a new website so that their patients and clients could easily find and contact them.

We incorporated their new branding into the website, and made it look approachable and modern.

The website has a subtle animation for each section to give it a soft and dreamy feel, which is the kind of feeling whenever one becomes a mother. A few icons and graphics are placed in the website to make it look fun and approachable.
